Heating Core

The „heating core“ of format 60x60 cm. In this case with cork cover. The heating mat is stuck to the front of the cork. Cables and power supply are hidden behind the panel.

Different „skins“ are fixed to the heating core:

- Plain white
- Black marble
- Travertin white
- Sandcoated structure

Skins (1)

Plain white blends with most walls.

Also available in perforated metal sheet (powder-coated or painted).

Skins (2)

Sandcoated on metal. The sides can be covered with different lists / frames or can be painted in a contrast colour.

Skins (3)

Black marble as laminate on the backside of tempered glass (security glass)

Rem.: samples are produced on acrylic glass due to risk of transport damages.

Skins (4)

White travertine
as laminate on the
backside of
tempered glass
(security glass)

Rem.: samples are produced
on acrylic glass due to risk of
transport damages.

Modular Heating (Samples 4)
